PROFESSIONAL SUMMARY

Motivated second-year Information Technology student seeking a Software Development Engineer (SDE) Internship. Proficient in Java and C++ with a strong foundation in Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), and problem-solving. Solved 50+ LeetCode problems, strengthening algorithmic thinking and coding proficiency. Passionate about building software applications, learning emerging technologies, and collaborating in team environments to develop scalable and efficient solutions. A quick learner with strong analytical skills, adaptability, and a commitment to continuous improvement.

TECHNICAL SKILLS

Programming Languages: Java, C++, C, HTML/CSS.

Concepts: Object-Oriented Programming (OOP), Time and Space Complexity Analysis, CRUD Operations.

Tools & Platforms: Git, GitHub, VS Code, g++

PROJECTS

Student Management System | C++ | [GitHub Repo](#)

MAY 2026

C++ | Object-Oriented Programming(OOP) | File Handling | STL

- Developed a **console-based Student Management System** in C++ to manage student records efficiently.
- Implemented **CRUD operations**, including adding, updating, deleting, searching, and viewing student records.
- Utilized **Object-Oriented Programming (OOP)**, **file handling**, and **STL** for modular design and persistent data storage.
- Designed an intuitive **command-line interface (CLI)** with input validation and structured program architecture.

Interactive Personal Portfolio Website | [GitHub Repo](#)

June 2026

HTML5 | CSS3 | JavaScript | Three.js

- Developed and deployed a responsive personal portfolio website using **HTML5**, **CSS3**, **JavaScript**, and **Three.js** to showcase technical skills, projects, education, and achievements.
- Implemented an **interactive 3D WebGL background**, custom cursor system, typewriter animation, scroll reveal effects, and dynamic card interactions to enhance user experience.
- Built **responsive navigation**, **mobile menu**, **smooth scrolling**, **certificate lightbox**, and **interactive UI components** using JavaScript and DOM APIs.
- Managed source code with **Git and GitHub** and deployed the production website on **Vercel**, demonstrating frontend development and web deployment workflows.

EDUCATION

Bachelor of Technology - Information Technology

2025 - 2029

Sri Krishna College of Engineering and Technology, India | SGPA: 9.23 / 10.0

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming with C++, Discrete Mathematics, Computer Organization and Architecture

ACHIEVEMENTS AND COMPETITIVE PROGRAMMING

- Solved 50+ Data Structures and Algorithms problems on LeetCode, covering arrays, linked lists, trees, graphs, dynamic programming, and sorting.
- Participated in Yugam Codeathon 2026 at Kumaraguru college of Technology, demonstrating problem-solving and collaborative software development skills.

CERTIFICATIONS

Google AI Essentials – Google, Introduction to Git and GitHub- Google.

INTERESTS

Competitive Programming | Data Structures and Algorithms | Backend Systems Design | Open-Source Software Development | Low-Level Programming | Distributed Systems | Software Engineering Research | Front End Development

EXTRAS

Analytical Skills: Possesses strong analytical and problem-solving abilities, coupled with a keen attention to detail.

Adaptability & Learning: A quick learner, easily adaptable to new technologies and development.

Teamwork: A collaborative team player who can also work effectively and independently when necessary.
